

## D1NR 2006 QE WORKSHOP TOPICS

---

(not in order of attention or priority; additional topics will be added prior to workshop)

- ❖ review of how QE-OTO communication worked in 2005 (currency, initial qualification, OTO's concerns about what reaches his office in terms of what QE is supposed to have checked first)
- ❖ review of how currency worked in 2005 overall to see what could be improved
- ❖ review of QE and coxswain activity statistics for 2005. QE Currency discussion (if needed)
- ❖ review of QE scheduling: goodnesses, badnesses, issues with candidates and multiple attempts, etc. Are members being served adequately, and is your time effective and not wasted?
- ❖ Incident Command System/National Incident Management training status and expected direction from G-OCX at HQ...QEs leading by example
- ❖ Boat Crew STAN team information (not much available), and any feedback we wish to provide
- ❖ Any review discussion of check ride topics we wish to have as QEs prior to afternoon candidate/Mentor/QE session
- ❖ The OTO very nearly has an active duty QE list complete (just not quite in time for the conference). This will allow outreach to these folk to help make sure both Auxiliary and active duty are mostly on the same page. What suggestions do you have as we are able to start this outreach?
- ❖ outstanding policy items that deserve written clarification from DIRAUX to members (and any additions; not discussion of items in detail but to enumerate QEC action list for 2006).
- ❖ review of QEC's outreach in 2005 to Aux leadership, and plans for 2006
- ❖ quality of overall program and directions for improvement at any levels
